Esna Holidays (Private) Limited • www.esnaholidays.com One of the most important activities of the project is its hatchery. Within the sanctuary of the project, collected and rescued eggs can hatch safely away from predators before being released into the sea at night-time. In addition, a certain number from each hatching are kept back for a short period for 'headstarting' before release. The hatchery program is designed to maximize the number of hatchlings reaching the sea and surviving through the critical stages of their early life. Only a few hatchlings from each batch will ever make it to adulthood. Therefore, every nest-ground, every egg, every hatchling, and every turtle is crucial to the survival of the species.
