The temple itself is one of the more enterprising establishments devoted to this legend and contains a granite statue of Lord Hanuman that is said to be over 40 feet tall. It is believed that Lord Hanuman was searching for Sitadevi from these hills of Ramboda. The Ramboda area is believed to be an area where Rama's forces were gathered against Ravana. Visit Seetha Amman Temple: Temple the stream that runs from the hill, catered to the needs of Sitadevi during her stay at Ashok Vatika. She is said to have bathed in this stream. About a century ago of three idols was discovered in the stream, one of which was that of Sita. It is believed that the idols have been worshipped at this spot for centuries. Now there is temple for Lord Rama, Sitadevi, Luxshmana, and Hanuman by the side of this stream. The main aim of the project is to monitor local sea turtle activity and conserve the local nesting sites. We aim to make the public more aware of how endangered these beautiful creatures are and just how important it is to help protect them before it is too late. One of the most important activities of the project is its hatchery. Within the sanctuary of the project, collected and rescued eggs can hatch safely away from predators before being released into the sea at night-time. In addition, a certain number from each hatching are kept back for a short period for 'headstarting' before release. The hatchery program is designed to maximize the number of hatchlings reaching the sea and surviving through the critical stages of their early life. Only a few hatchlings from each batch will ever make it to adulthood. Therefore, every nest-ground, every egg, every hatchling, and every turtle is crucial to the survival of the species. Unfortunately, sea turtles face many dangers. Or You can do water activities on additional cost.
